ANNOUNCEMENT

BMP 201 – MT SWPPP Administrator/Preparer Certification Program

On line registration open now: www.altitudeta.com

The BMP 201 (Montana) is the **SWPPP Administrator/Preparer Certification** program. This class meets the educational requirements of the Montana Construction General Permit and has been authorized by the DEQ. The certification is valid for 3 years. The class is offered as in person, hybrid or online. A hybrid class means the first day is offered online and the second day is in person. BMP 101 or the equivalent is a prerequisite to take this class. If you have some experience with storm water management during construction, you probably don't need the BMP 101 class. If you are new to the subject and need to lay a foundation in storm water management during construction, you need the BMP 101.

COST: $550/person

DATES: **Hybrid BMP 201 Oct. 20 & 21, 2026**
In Person BMP 201 March 23 & 24, 2027
Online BMP 201 July 21 & 22, 2027

The class will run from 8am to approximately 4:00pm both days.

For the in person and hybrid classes there is an on-site field trip, so bring a hard hat, high visibility vest and proper footwear.
